

with any volunteers and public places that volunteers have been. Leadership will notify all of those outside of BDM of any potential contact.

**Required personal safety measures**

The following items are a general overview of personal safety measures that will be required on the BDM sites. Additional procedures and precautions will also take place at each location and will be shared upon arrival.

**Before Traveling**

All volunteers should **not leave home if:**

1. They are exhibiting symptoms of **any illness** before departure. Volunteers are also recommended to monitor their temperature 3 days prior to travel and not travel if it has been above 100 degree during any of these checks.
2. They have been in contact with someone in the last 14 days who has tested positive or is waiting on a test result for COVID-19.
3. They are not comfortable traveling or observing ALL the safety protocols listed below that are now required on a BDM rebuilding sites.

We know it is disappointing for the volunteer, but it is better for them not to go to the site than to share their illness on the site.

**Precautions on Site**

Physical distancing of at least 6 feet apart should always be observed when around other people.

Volunteers must wear face coverings over their nose and mouth when indoors including in the housing facility, in vehicles, on the job sites, and when entering local businesses. When the minimum of six feet apart is not possible either indoors or outdoors, volunteers must wear face coverings. (e.g. drywalling, team lifting). When eating or drinking, etc., they must be at least 6 feet apart before removing a mask to do so. A mask will be provided but volunteers are encouraged to bring their preference from home to be used while traveling to the site.

Frequently wash hands for 20 seconds and/or wipe off gloves with a cleaning wipe while on the job site and especially before removing your mask or touching your face. When running water and soap are not available use hand sanitizer containing at least 60% alcohol. Gloves will be required on the job site and will be provided by BDM if the volunteer does not bring a pair from home.

BDM will provide touchless thermometers and all volunteers and leaders will have their temperatures read each morning and afternoon. This will be recorded by BDM project leadership.

Groups and individuals will not be permitted to travel if there are Stay at Home orders in the location of the BDM rebuilding site and volunteer's homes.

Coughing or sneezing must be done into the elbow.

Volunteers should avoid touching their face as much as possible and wash their hands with soap and water or use hand sanitizer before touching any part of their face.

Volunteers should report any symptoms of any illness to leadership immediately or if they have tested positive for COVID-19 within 14 days after volunteering.

I, \_\_\_\_\_ have read and agree to abide by the all above mentioned safety procedures at all times when on a BDM Rebuilding site. If I do not, I know I can be required to return home.
